Return To The Golden Age Of Man – A Journey Thru The Corridors Of Time

Did original man on Earth inhabit bodies different than those of present day? Is modern man a genetically engineered species that has evolved over the last million years with his origins forgotten? Has the real story of man been hidden in religious writings and mystery schools awaiting the return of the Cosmic Golden Age? Is the return of the Cosmic Golden Age occurring simultaneously with the new Age of Aquarius? How are we being prepared to break the mental and emotional chains that bind us in fear and superstition?

Our Planet is being vitalized with an expanded view of Physical existence. We are being taught that we are children of The Light, and how to shed our fears of the unexplored path. We are learning that we must move boldly into the Light of this new Cosmic Golden Age, which is getting stronger each day; that the teachings of Thoth, the Atlantean, are once again being brought to our awareness; and that more advanced "Brothers" from other areas of space have been helping us for more than fifty years to awaken to the Truth.

Return To The Golden Age Of Man – A Journey Thru The Corridors Of Time shares some of the insights discovered in the journey of one Light among millions searching for a new understanding.

(Note: includes a program to develop the Tensor Centers of the brain.)

Jerry Mae Issa

April 26th, 1933 - December 16th, 2008

After a long fought with several health issues, Jerry Issa left to go home, leaving a legacy of light and love.

Jerry has gifted me many audio goodies, and I will be working in coming months to post them here. Also, you can read Jerry work on the F2F Forum before she passed.

Richard Miller Radio Series Circa 1956-1974

Richard Miller became a contactee around 1954. Prior to that time he served in a branch of the armed forces that later became the U.S. Air Force, was personally knowledgeable of the UFO phenomena taking place in the 1940's, and participated in some top government UFO studies. After becoming a contactee, he actually spent time aboard an alien craft by invitation of its occupants (the same aliens who had previously made physical contact with our President Eisenhower).

At the time of contact, he lived here in Michigan. He became a channel around which a group formed to study the messages he was receiving. These recordings are classic and the information contained in them are more pertinent today than ever before. The first two series were aired on radio in California in 1956 and 1958 and predate much of what has transpired in technology and knowledge of alien visitations today.
